Hams and sausages Romero Jara-Jabugo

DocuRemote provides selling-point control and staff productivity improvement

Romero Jara-JABUGO
Jamones y Derivados
del Cerdo Ibérico

Mission

Romero Jara-JABUGO S.L.L. is a company specialising in Iberian pork-derived sausages production and selling, based in two Andalusian localities.

In Jabugo (Province of Huelva), it is constituted by a ham and sausage plant and a supermarket, and in Seville, it integrates various outlet point specialised in selling and tasting their products.

The tavern and restaurant chain has the mission to make know the genuine Iberian pork from Jabugo, well-known region for the quality of its pig livestock.

Objective

From the Seville-based central, the company wanted to control consumption and visualise the staff working in its chain of selling and tasting points.

Solution

The Movi Sevilla company, distributor of I&IMS DocuRemote videosurveillance system, introduced a project enabling the control of the supermarket aisles in Jabugo, and the bars and tables of the taverns and restaurants in Seville.

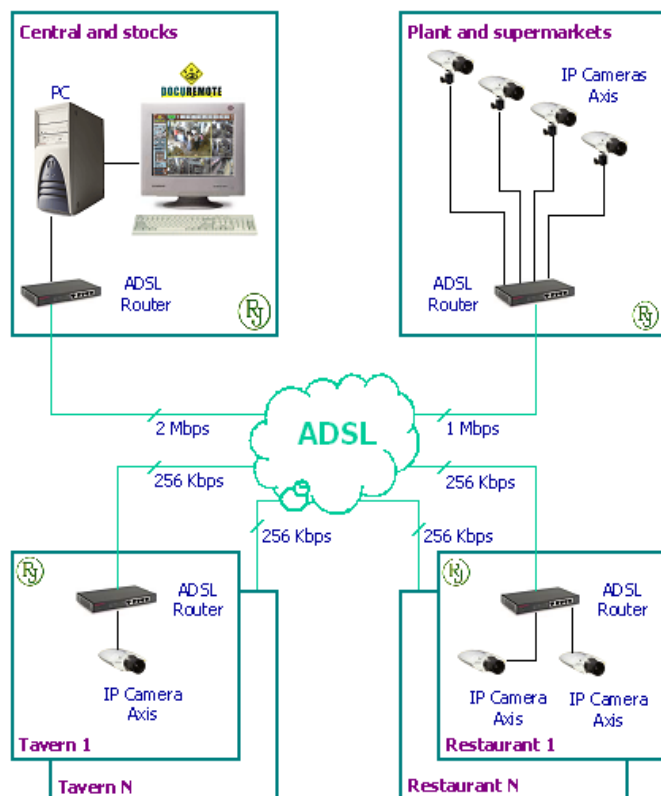

In the supermarket, we installed 4 IP fixed Axis 2110 cameras to visualise aisles and shelves, they are connected with an ADSL line in order to remotely control them.

In the restaurants and taverns of the Andalusian city, we installed IP cameras with remote XY motion control Panasonic NM-100 and IP fixed Axis 2110 cameras to visualise the working environment in these points.

All these cameras were directly connected to Telefónica ADSL routers, with private access keys, in order to realise an exclusive control on the videosurveillance system.

The scheme of the components configuring the DocuRemote solution designed for Romero Jara-Jabugo is as follows:

Company profile

Romero Jara-Jabugo distributes meat products derived from Iberian pork from the ham dryer and sausage plant located in Jabugo (Huelva), where it also owns a supermarket to make know its exquisite product to the local inhabitants as well as to the tourists visiting the beautiful environment of the Sierra de Aracena and the Aroche Peaks.

In Seville, it owns taverns and restaurants enabling to taste the variety of its products, as the result of a

mix of artisany and tradition savoir-faire, by using the new technologies applied to the meat industry.

Results

The videosurveillance system implemented by Movi Sevilla and based on I&IMS DocuRemote software and Axis and Panasonic IP cameras, allowed to carry out remote staff control and, consequently, to increase the workers' productivity. They have also reached a control of their products' consumption thanks to the different cameras strategically installed in their selling points.

The Client

The videosurveillance system implemented by Movi Sevilla and based on I&IMS DocuRemote software and Axis IP cameras, allowed to carry out remote staff control and, consequently, to increase the workers' productivity. They have also reached a control of their products' consumption thanks to the different cameras strategically installed in their selling points.
